JACK BERMAN  
PRIMARY EXAMINER

Art Unit: 2881

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Superko on November 22, 2004.

The application has been amended as follows:

IN THE CLAIMS:

16. (Currently Amended) An ion implantation system comprising:

an ion beam source capable of generating an ion beam;

a first dopant gas supply connected to the ion beam source for introducing a dopant gas to the ion beam;

a housing downstream of and proximate to the ion beam source and positioned so that the ion beam passes therethrough; and

a second neutralizing gas supply constructed and arranged to introduce neutralizing gas into a region defined, at least in part by the housing.

19. (Canceled)

20. (Currently Amended) The ion implantation system of claim ~~19~~ 16, wherein the housing is upstream of an acceleration/deceleration column for accelerating and decelerating the ion beam to a desired energy.

Art Unit: 2881

The following is an examiner's statement of reasons for allowance: The prior art does not teach to supply a neutralizing gas for neutralizing the space charge of an ion beam to a region adjacent to an ion source in an ion implantation system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
